the Kirkpatrick-Phillips (KP) model

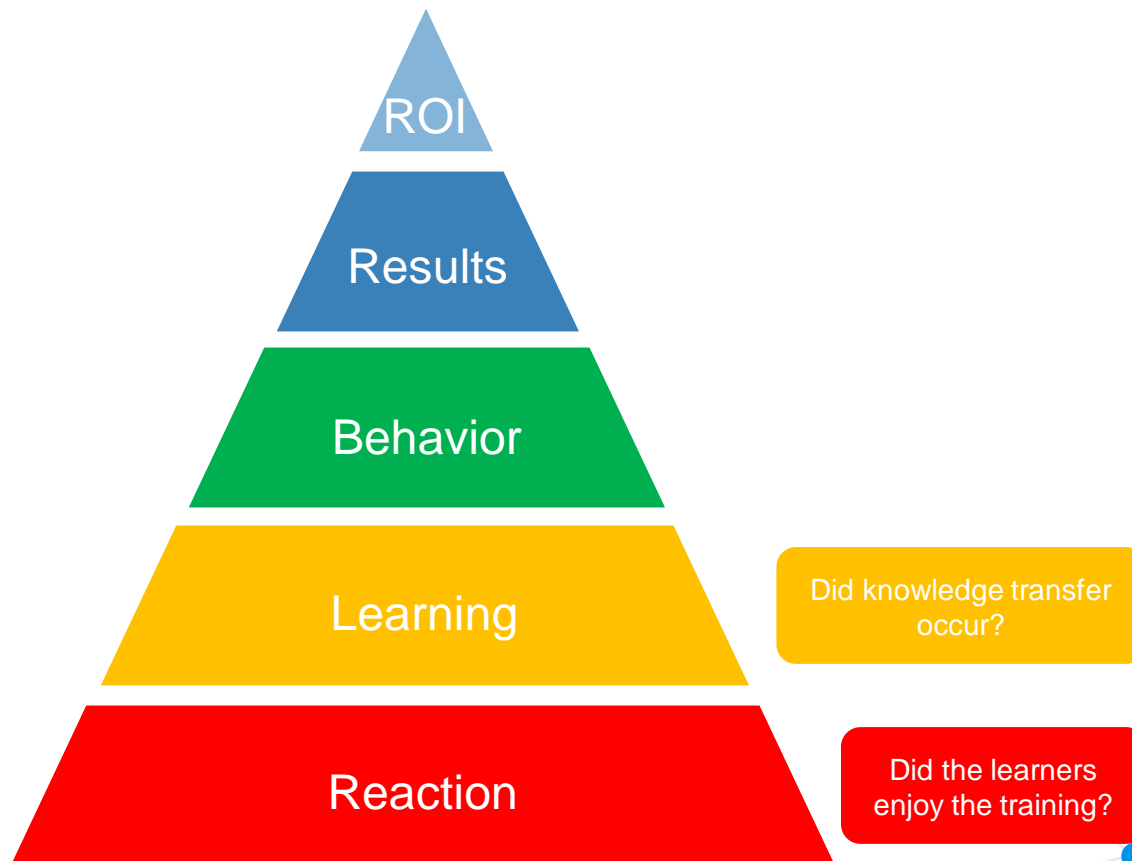

This model is used to assess the quality of a company training:

What is the aim of a
school?

**What is the aim of a
school?**

**global growth of
the person: grades
and social skills**

**What is the aim of a
school?**

**global growth of
the person: grades
and social skills**

**What are the costs in
a social LMS
mediated school
environment?**

**What is the aim of a
school?**

**global growth of
the person: grades
and social skills**

**What are the costs in
a social LMS
mediated school
environment?**

Social effort

What is the aim of a school?

**global growth of
the person: grades
and social skills**

**What are the costs in
a social LMS
mediated school
environment?**

Social effort

**What are the methods
to achieve these
goals?**

What is the aim of a school?

**global growth of
the person: grades
and social skills**

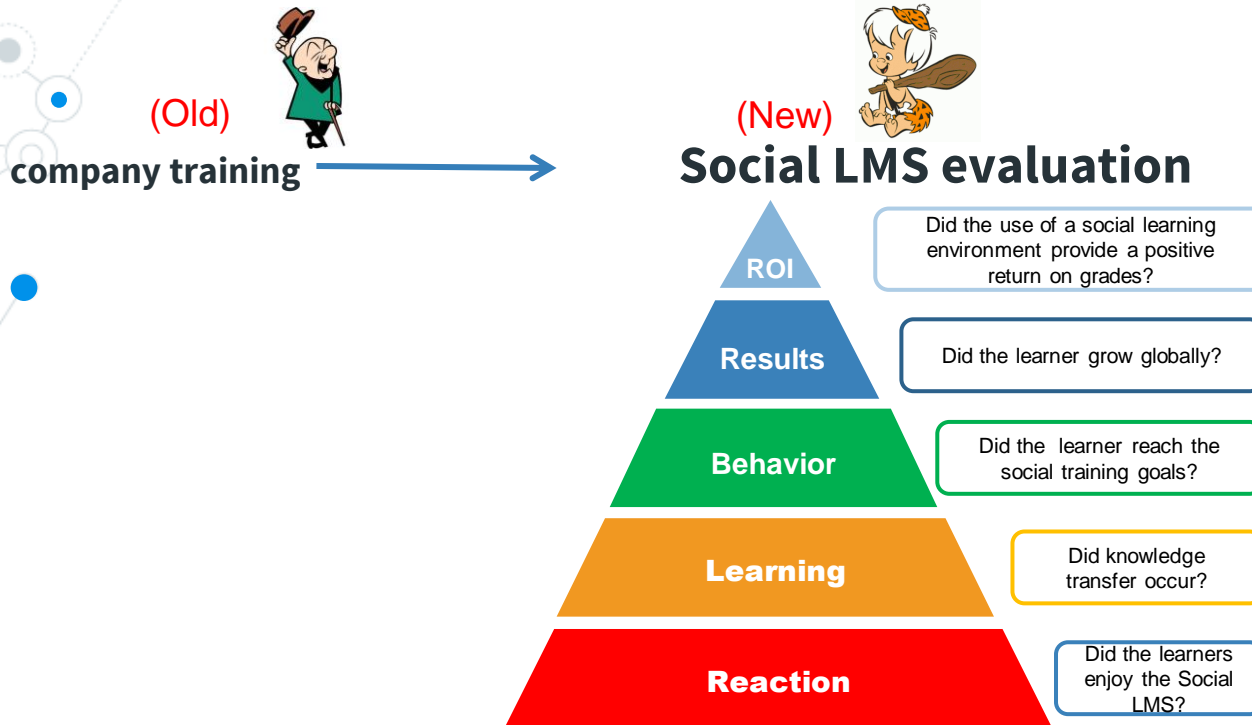

**What are the costs in
a social LMS
mediated school
environment?**

Social effort

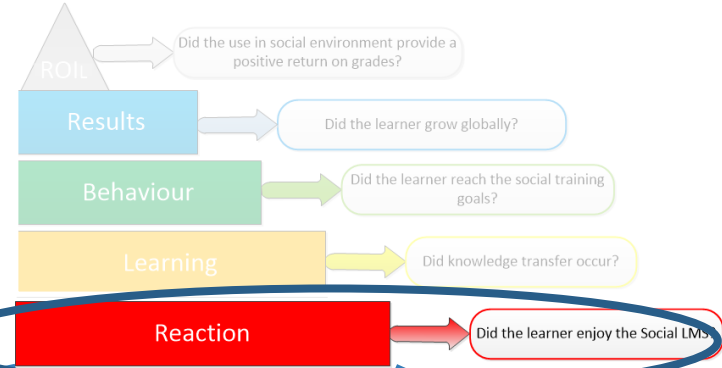

**What are the methods
to achieve these
goals?**

**Add material on the
social LMS**

towards a **NEW** Kirkpatrick-Phillips (KP) model

Old does NOT mean surpassed, just that it arrived first, NEW does not mean that it replaces the old concept but that it redefines it for a new environment!

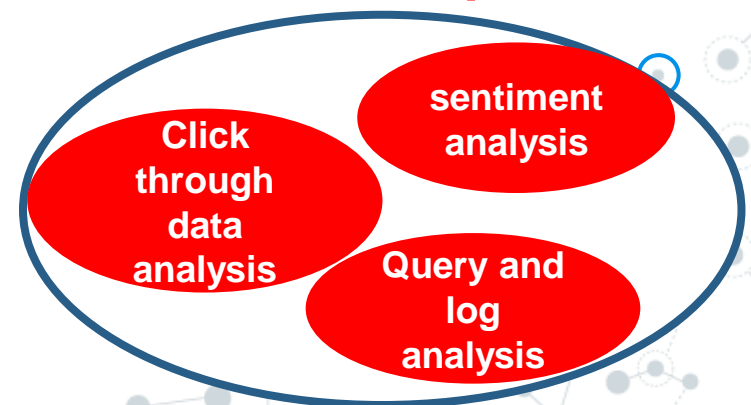

REACTION

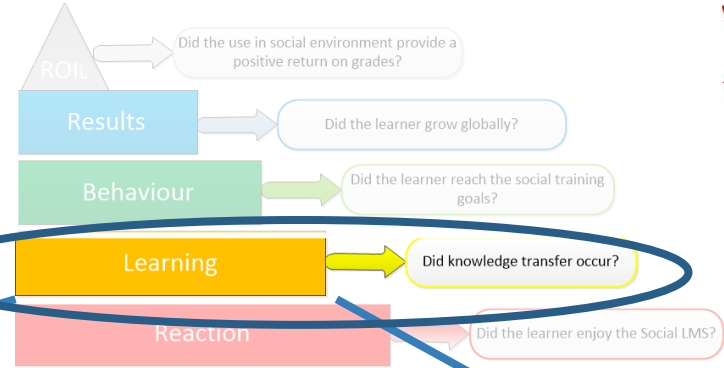

Did the learner enjoy the Social LMS?

Explicit

Implicit

LEARNING

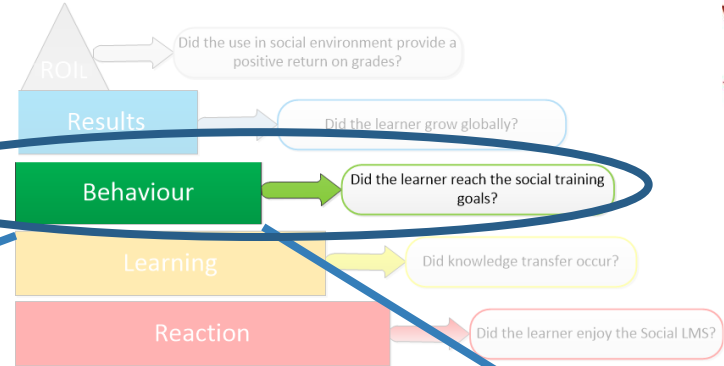

Did knowledge transfer occur ?

Formal

Informal

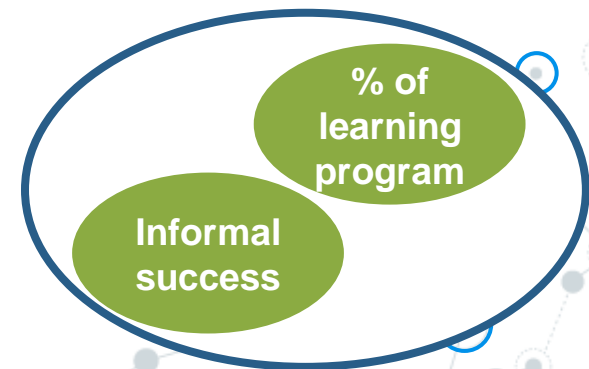

BEHAVIOR

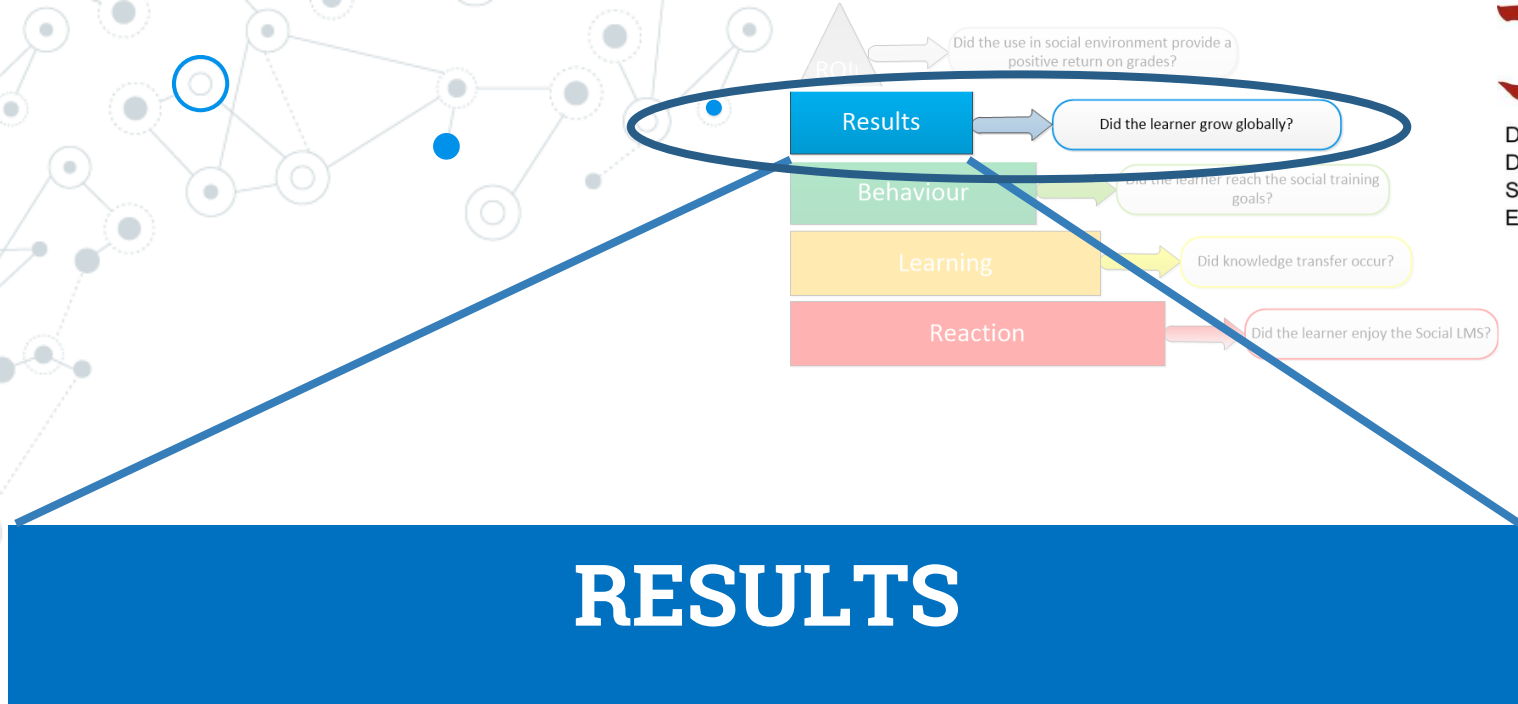

Did the learner reach the training goals?

Global

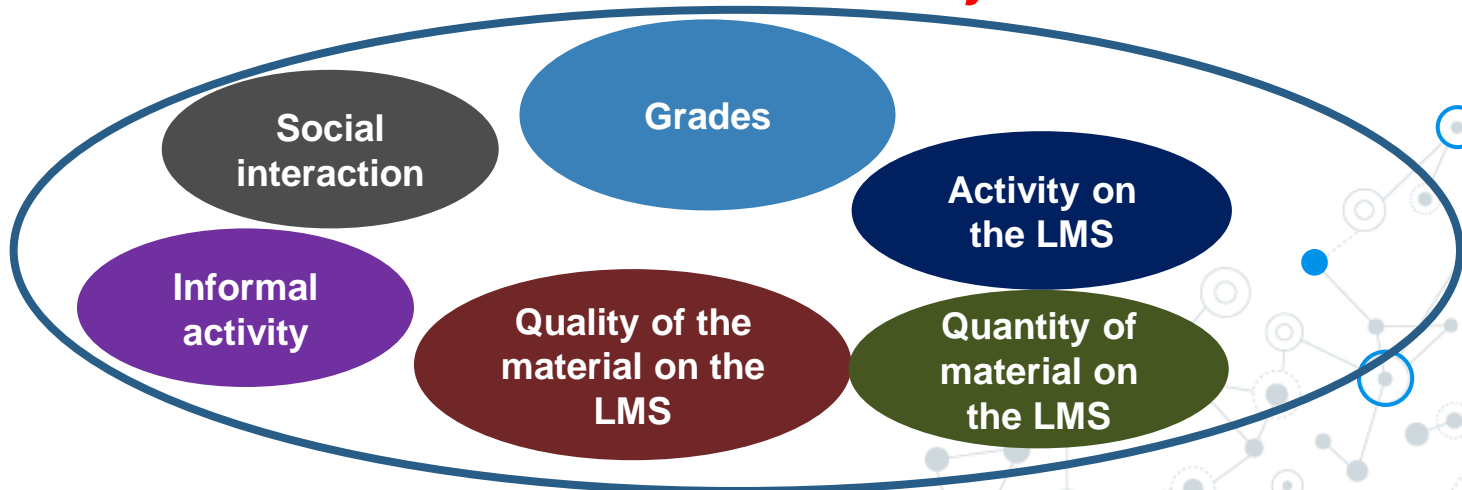

Personal

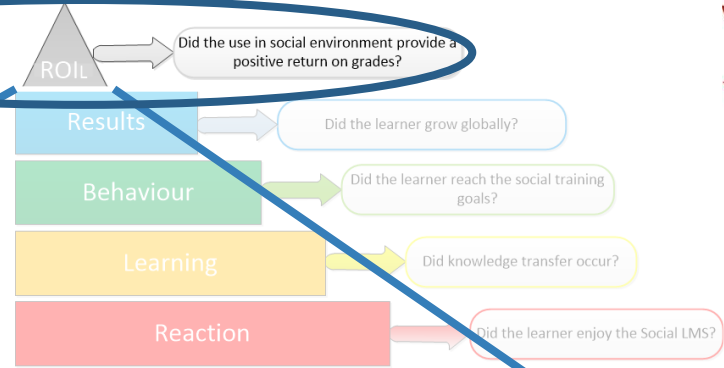

Did the learner grow globally?

Academic Performance and Social Activity

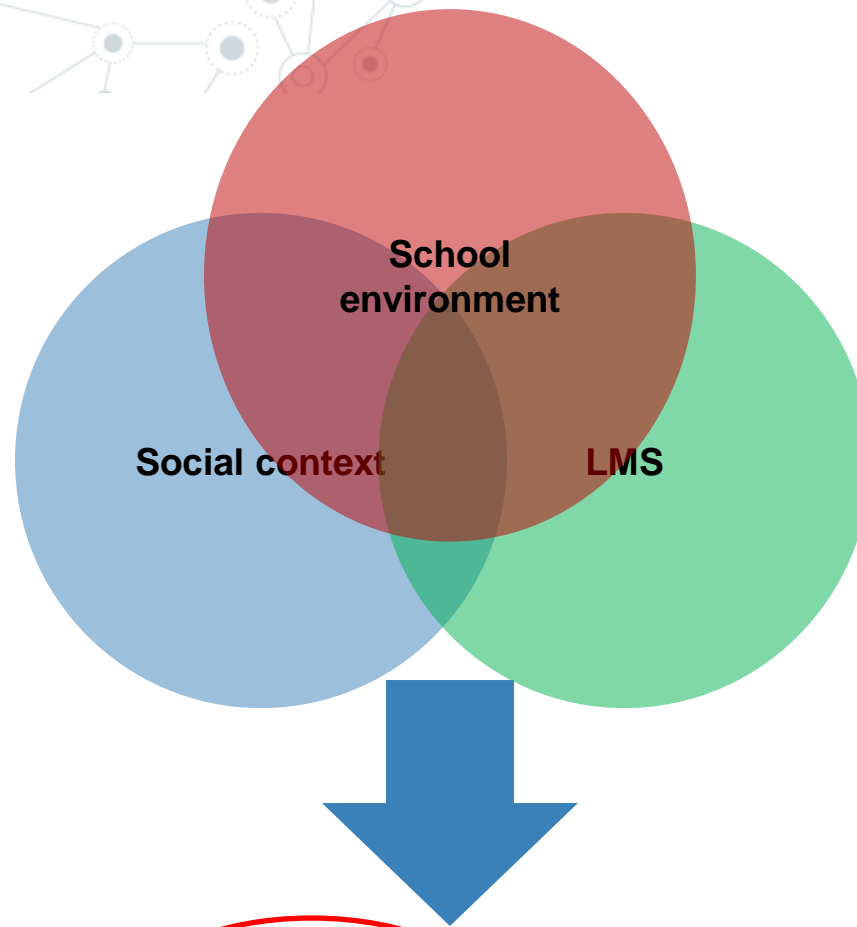

RETURN ON INVESTMENT (ROI)

**Did the use of social environment
provide a positive return on grades?**

have you improved your grades...

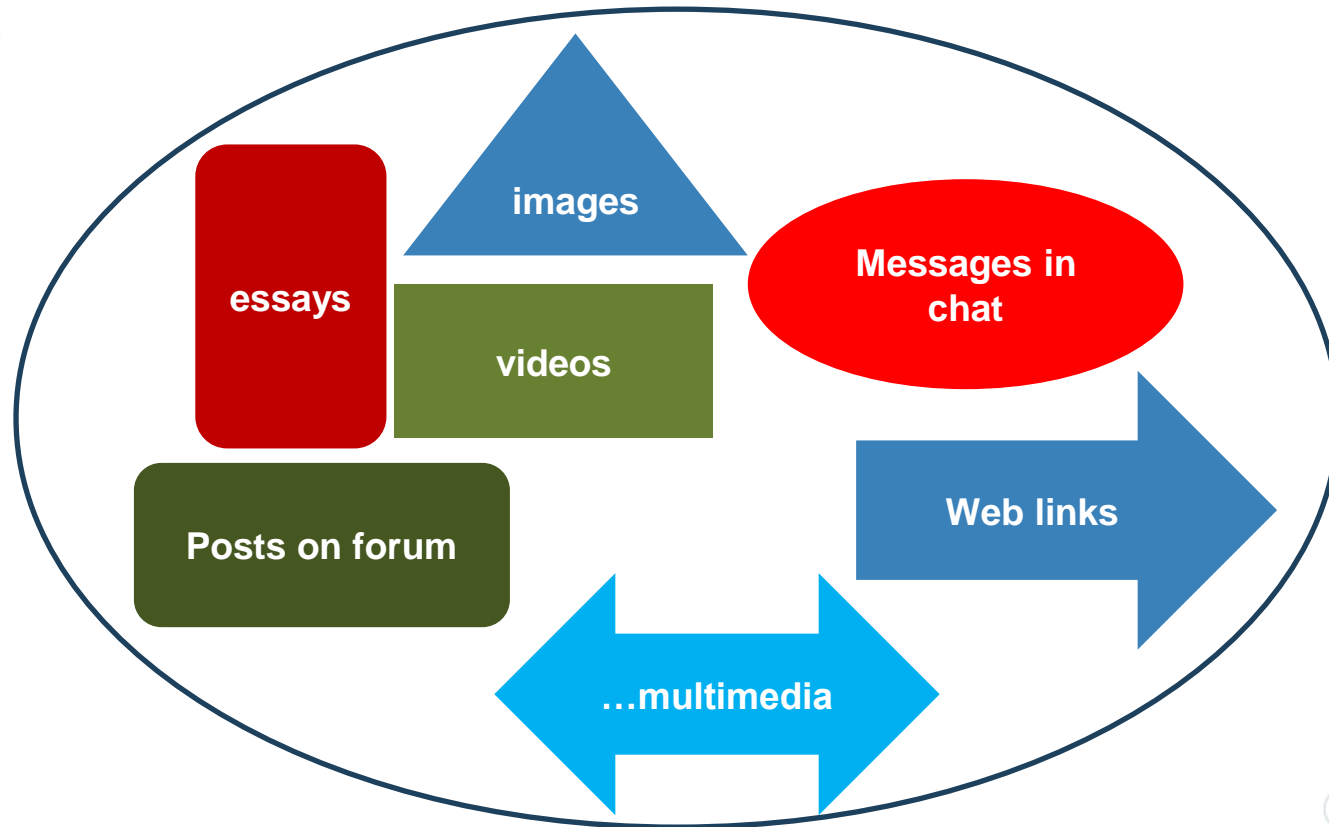

... by using the social LMS?

a network is defined by interaction of the
learners by the **material**!

the material:

Formal and Informal

We focus on the Chat and Forum

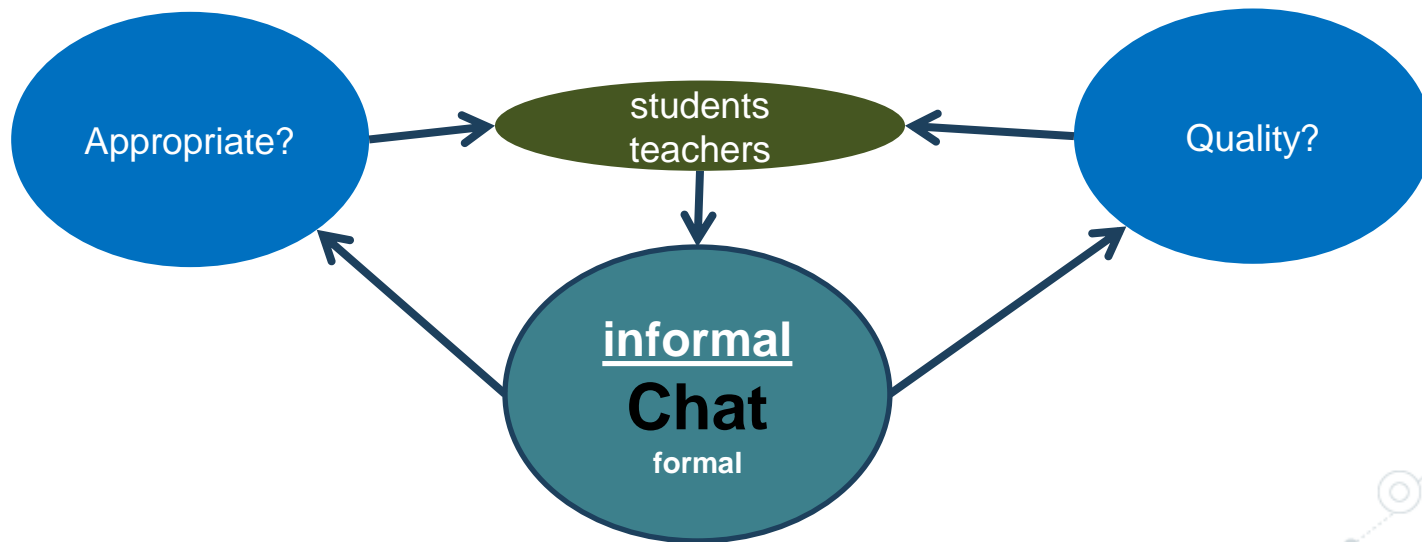

Social LMS mediated Interaction

students
teachers

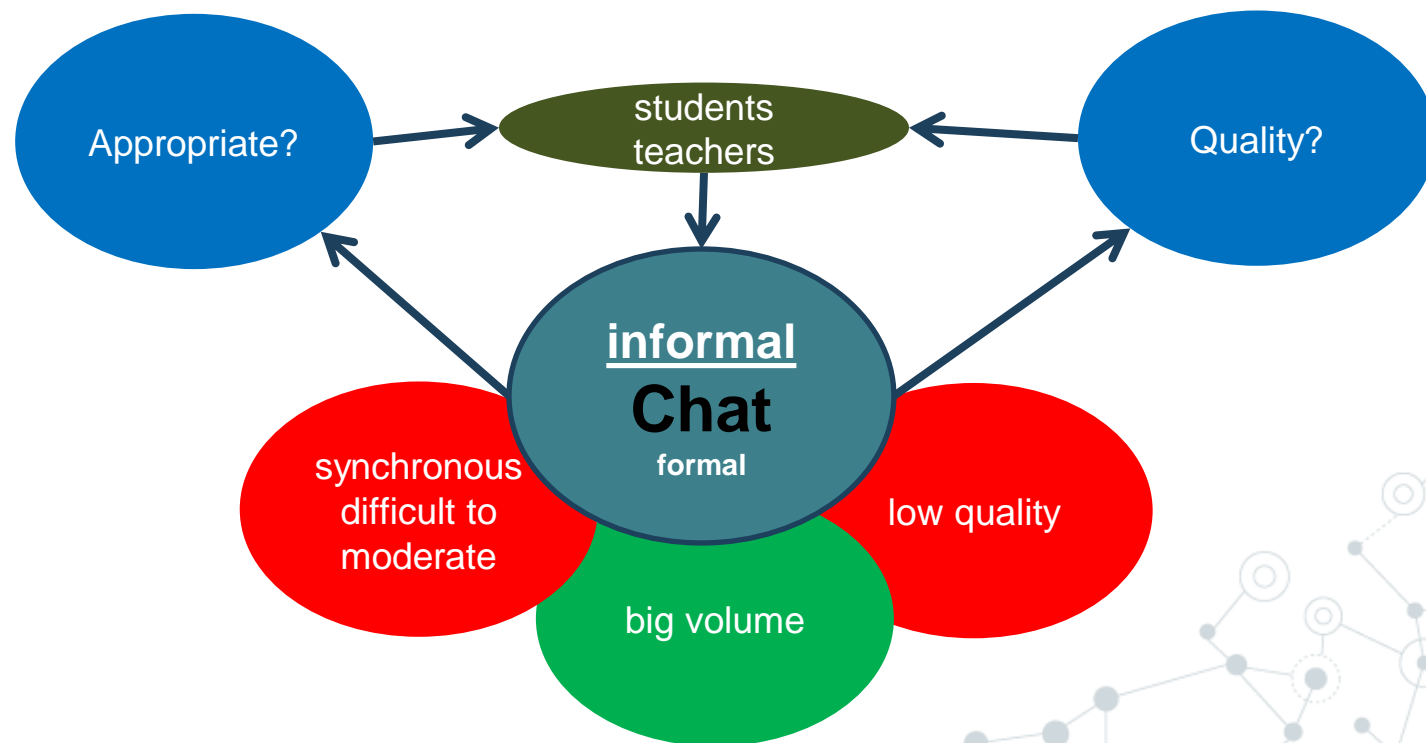

Social LMS mediated Interaction

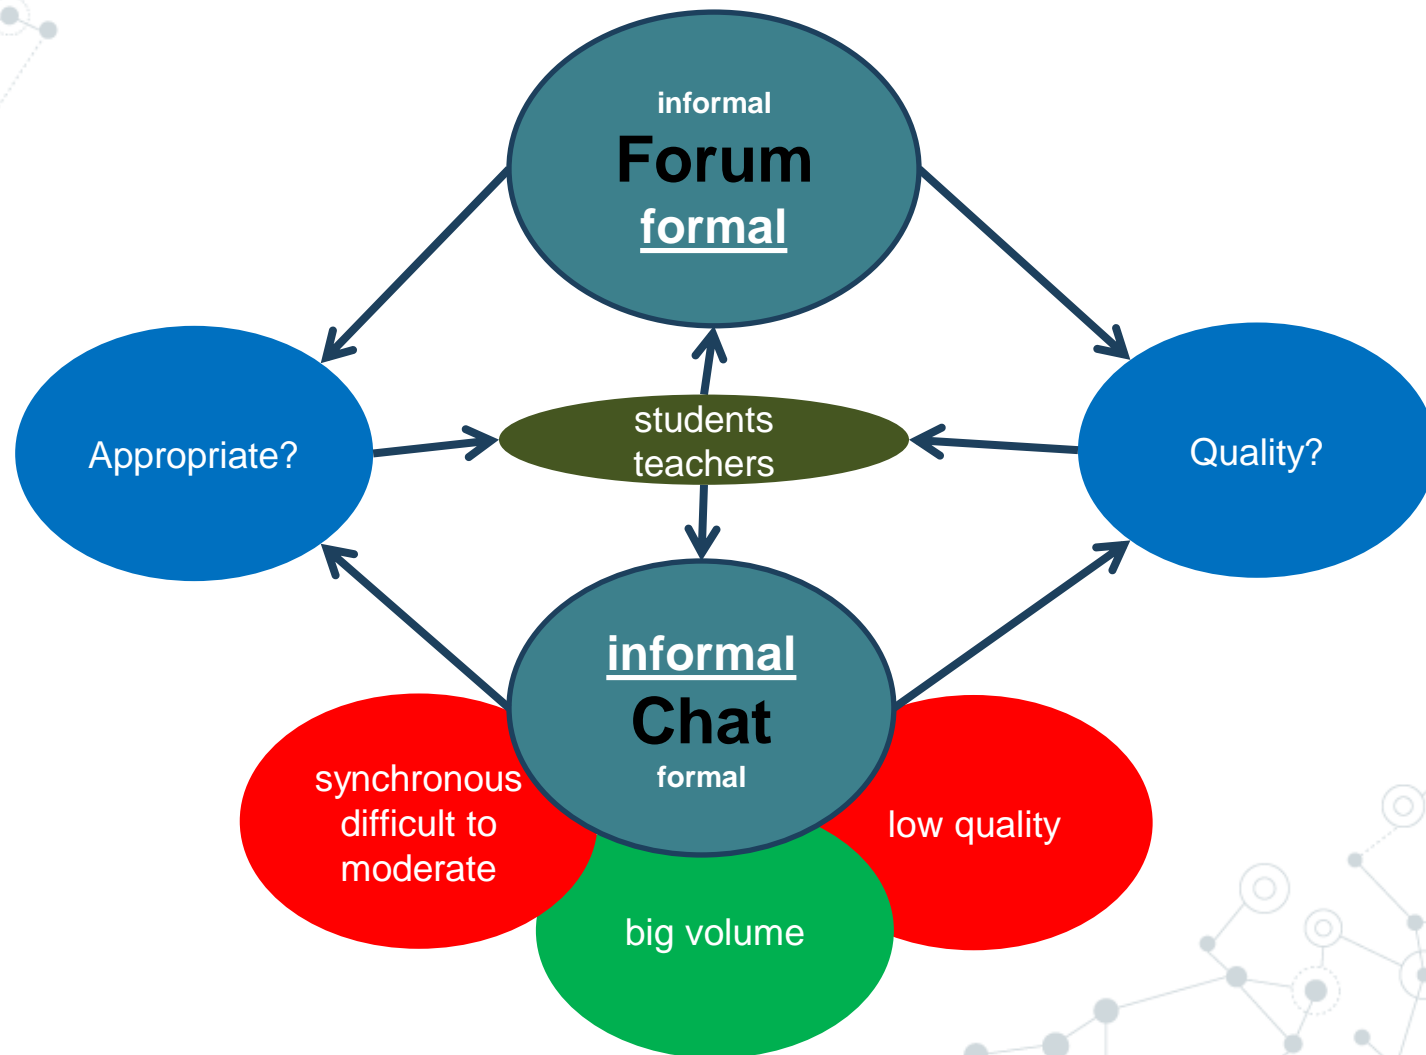

Social LMS mediated Interaction

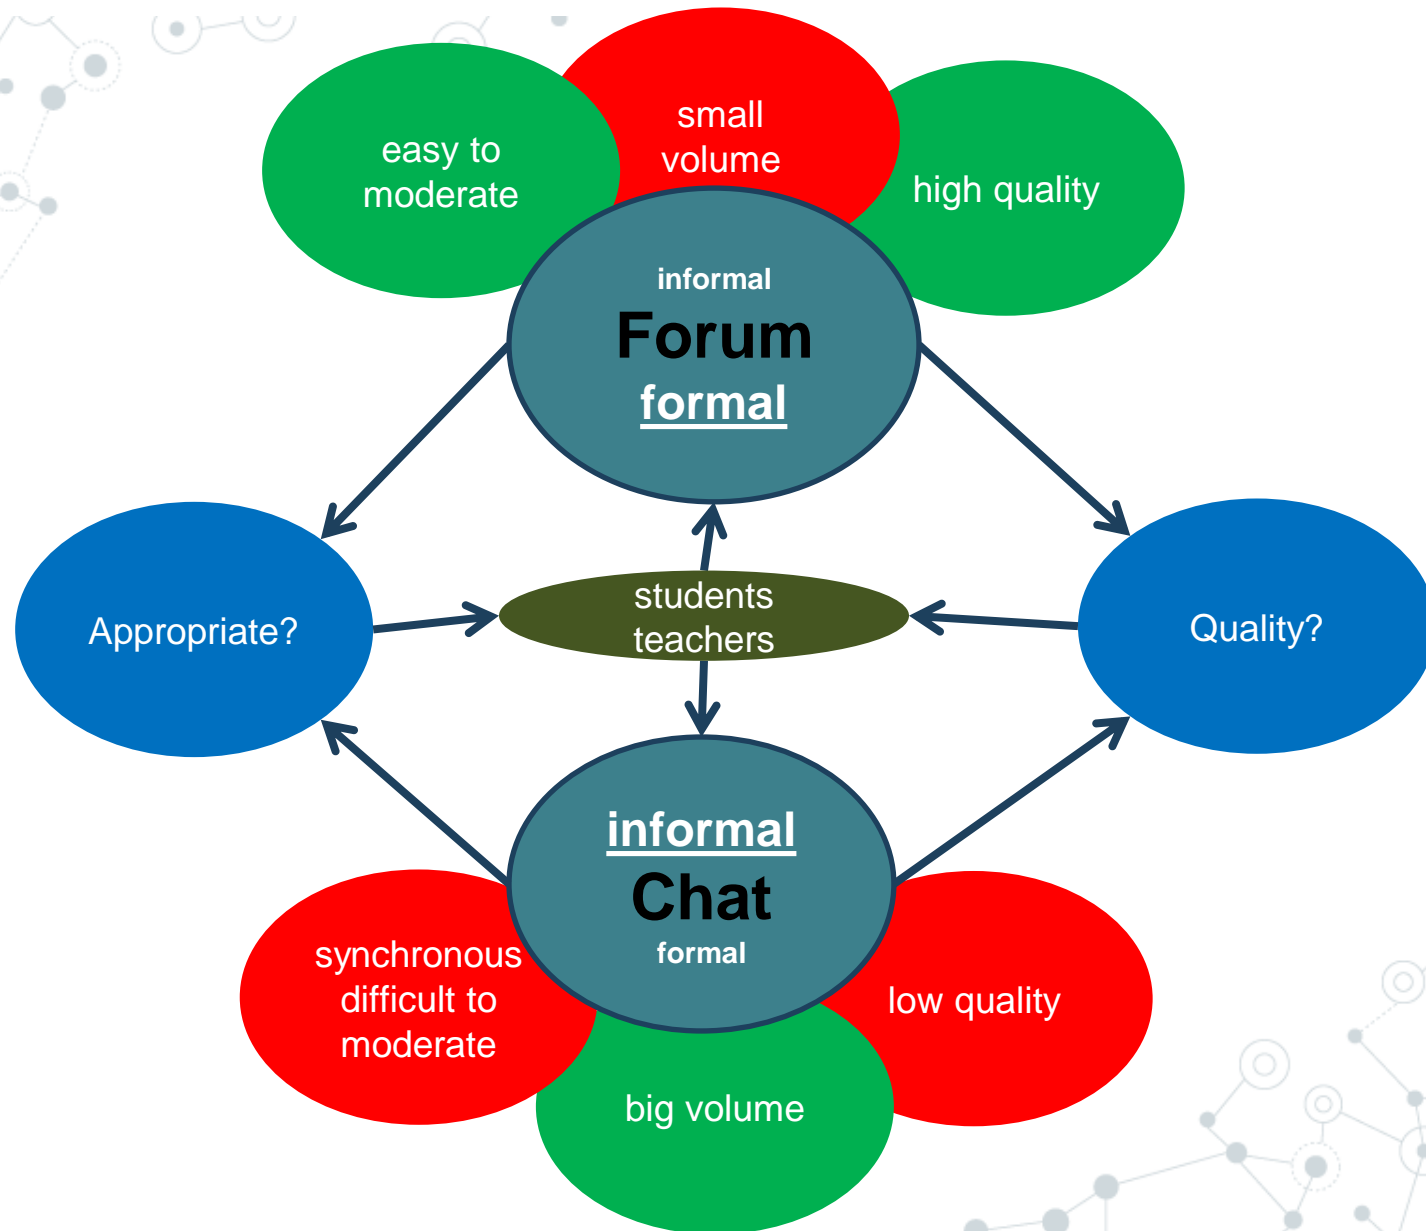

Social LMS mediated Interaction

Social LMS mediated Interaction

Social LMS mediated Interaction

Forum and Chat

new Key Performance Indicators (KPI)

Chat and Forum mediated networks:

We need an indicator which considers:

- the amount of (Social LMS mediated) interaction among people
- the time development of the interaction
- the different kinds of interaction

old is worse
than recent

Forum posts less
frequent than chat

Forum quality higher
than chat

Forum and Chat

new Key Performance Indicators (KPI)

total CONNECTION: K^F
(between person "a" and "b")

Daily interaction

Forum and Chat

new Key Performance Indicators (KPI)

total CONNECTION: K^F
(between person "a" and "b")

Daily interaction

$$C_n^F$$

Forum and Chat

new Key Performance Indicators (KPI)

total CONNECTION: K^F
(between person "a" and "b")

Daily interaction

$$C_n^F$$

$$K_{n-1}^F$$

Forum and Chat

new Key Performance Indicators (KPI)

total CONNECTION: K^F
(between person "a" and "b")

Daily interaction

Total connection
at time n

$$K_n^F = C_n^F + \lambda_F K_{n-1}^F$$

Forum and Chat

new Key Performance Indicators (KPI)

total CONNECTION: K^F
(between person "a" and "b")

Daily interaction

Total connection
at time n

$$K_n^F = C_n^F + \lambda_F K_{n-1}^F$$

time window

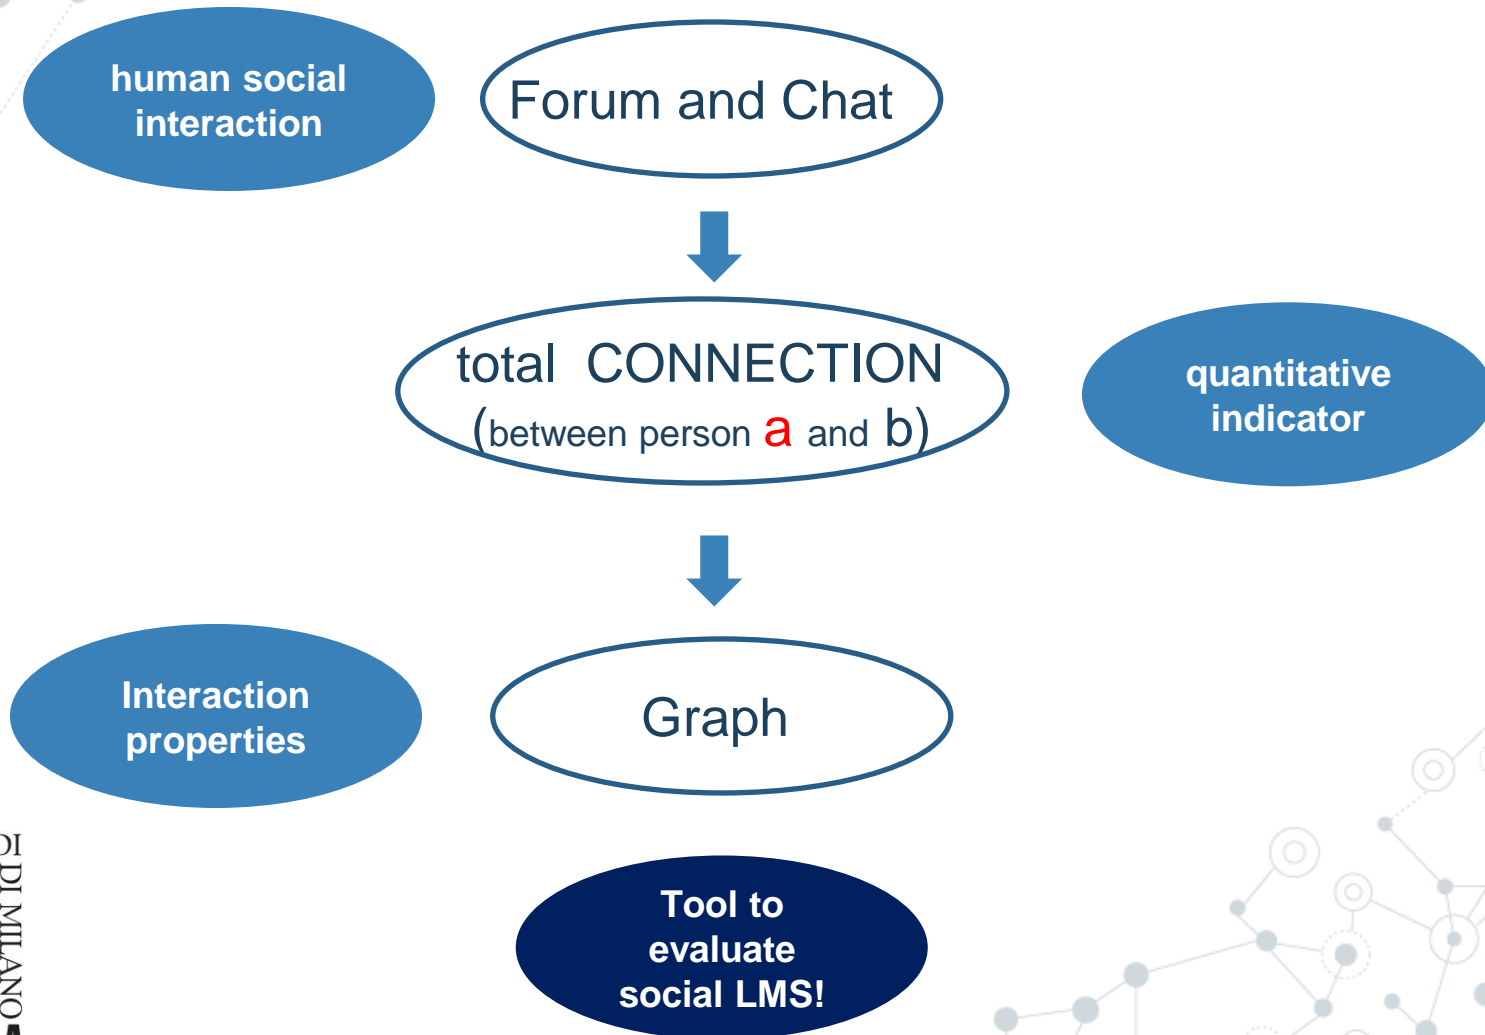

Forum and Chat

new Key Performance Indicators (KPI)

Forum and Chat

new Key Performance Indicators (KPI)

Educational Social Network (EduSN): A network of learners:

Social learning

time dependent!

Graph

Vertex = learner \leftarrow **$G(V, L)$** \rightarrow Link (edge) connection between learners = K_n

KP model for EduSN

KPI

Compactness

amount of interaction within social LMS
(Forum and Chat)

KP model for EduSN

KPI

Social Contribution

mix of appropriateness, quality and quantity of the material added on the social LMS

Compactness

amount of interaction within social LMS
(Forum and Chat)

KP model for EduSN

KPI

Betweenness and informal success

Graph properties (centrality measures) and success in non strictly academic activities

Social Contribution

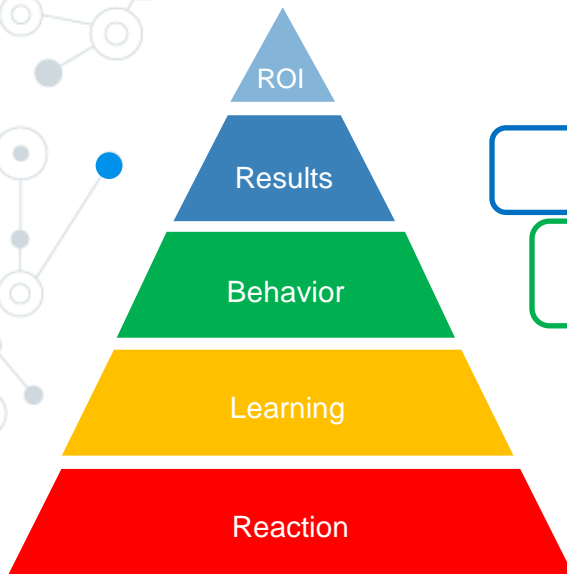

mix of appropriateness, quality and quantity of the material added on the social LMS

Compactness

amount of interaction within social LMS (Forum and Chat)

KP model for EduSN

KPI

Influence factor

value which includes the personal (learning) and global aspects (related to the structure of the graph)

Betweenness and informal success

Graph properties (centrality measures) and success in non strictly academic activities

Social Contribution

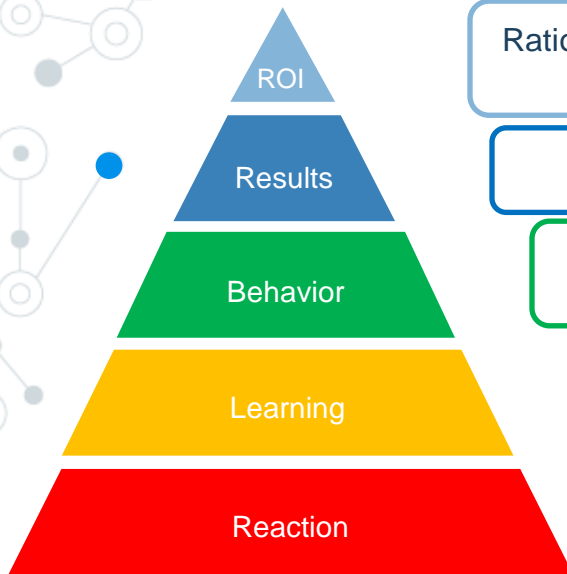

mix of appropriateness, quality and quantity of the material added on the social LMS

Compactness

amount of interaction within social LMS (Forum and Chat)

KP model for EduSN

KPI

Ratio of the *academic results* and social *influence factor*

to what extent the effort in the social interaction/production affected the quality of the academic results of the learners

Influence factor

value which includes the personal (learning) and global aspects (related to the structure of the graph)

Betweenness and informal success

Graph properties (centrality measures) and success in non strictly academic activities

Social Contribution

mix of appropriateness, quality and quantity of the material added on the social LMS

Compactness

amount of interaction within social LMS (Forum and Chat)

Needed:
a tool to evaluate the success of the Social LMS
(and to obtain useful data for all the users?)

DASHBOARDS

What features do we need?

Control of the EduSN: DASHBOARDS

1- Modular:

2- Time evolution:

3- Visual interpretation:

different KPI for different people

the EduSN evolves with time

graphs which render the interpretation easy

Material properties

Appropriate
contents

Teachers

Peers

Quality of
the contents

EduSN properties

Total Connection

6.3

Formal metrics

Control of the EduSN: DASHBOARDS

- 1- **Modular:**
- 2- **Time evolution:**
- 3- **Visual interpretation:**

different KPI for different people
the EduSN evolves with time (dyachronous aspect)
graphs which render the interpretation easy

formal activity

Informal activity

Control of the EduSN: DASHBOARDS

- 1- **Modular:**
- 2- **Time evolution:**
- 3- **Visual interpretation:**

different KPI for different people
the EduSN evolves with time (dyachronous aspect)
graphs which render the interpretation easy

formal activity

Informal activity

Achievements

Sept. 2015 English prize 1 Lev.

Nov. 2015 Theater Prize 30%

Control of the EduSN: DASHBOARDS

1- **Modular:**

2- **Time evolution:**

3- **Visual interpretation:**

different KPI for different people

the EduSN evolves with time (dyachronous aspect)

graphs which render the interpretation easy

formal activity

Informal activity

Achievements

-  Sept. 2015 English prize 1 Lev.
-  Nov. 2015 Theater Prize 1Lev.
-  Mar. 2016 Math prize 1 lev.
-  Eng. Prize II Lev. 70%
-  Math Prize II Lev. 30%

Control of the EduSN: DASHBOARDS

1- **Modular:**

2- **Time evolution:**

3- **Visual interpretation:**

different KPI for different people

the EduSN evolves with time (dyachronous aspect)

graphs which render the interpretation easy

John

Jane

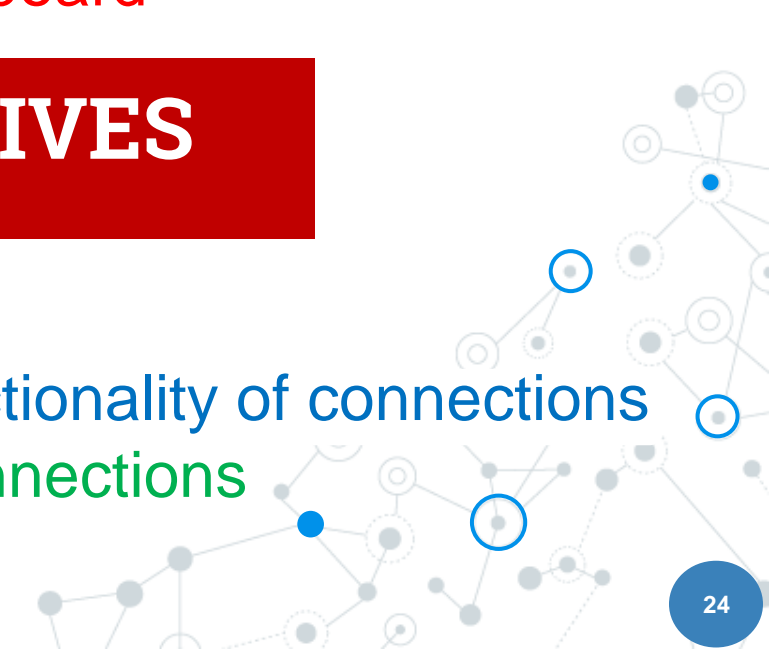

Synchronous aspect

CONCLUSION

- revised Kirckpatrick-Phillips model for Social LMS
- new Key Performance Indicators (for chat and forum)
- creation of an EduSN
- control method: modular Dashboard

PERSPECTIVES

- dashboards for different roles
 - improved KPIs including directionality of connections
 - consider the quality of the connections
 - interaction among structures
- 

questions, comments?

questions, comments?

Paolo Avogadro

University of Milano-Bicocca, Italy

paolo.avogadro@unimib.it

Hello!

I am Paolo Avogadro

I am here to introduce a
model for evaluating social
LMS with dashboards

You can find me at:
paolo.avogadro@unimib.it

SlidesCarnival icons are editable shapes.

This means that you can:

- Resize them without losing quality.
- Change line color, width and style.

Isn't that nice? :)

Examples:

Forum and Chat

new Key Performance Indicators (KPI)

total CONNECTION: K
(between person "a" and "b")

Daily interaction

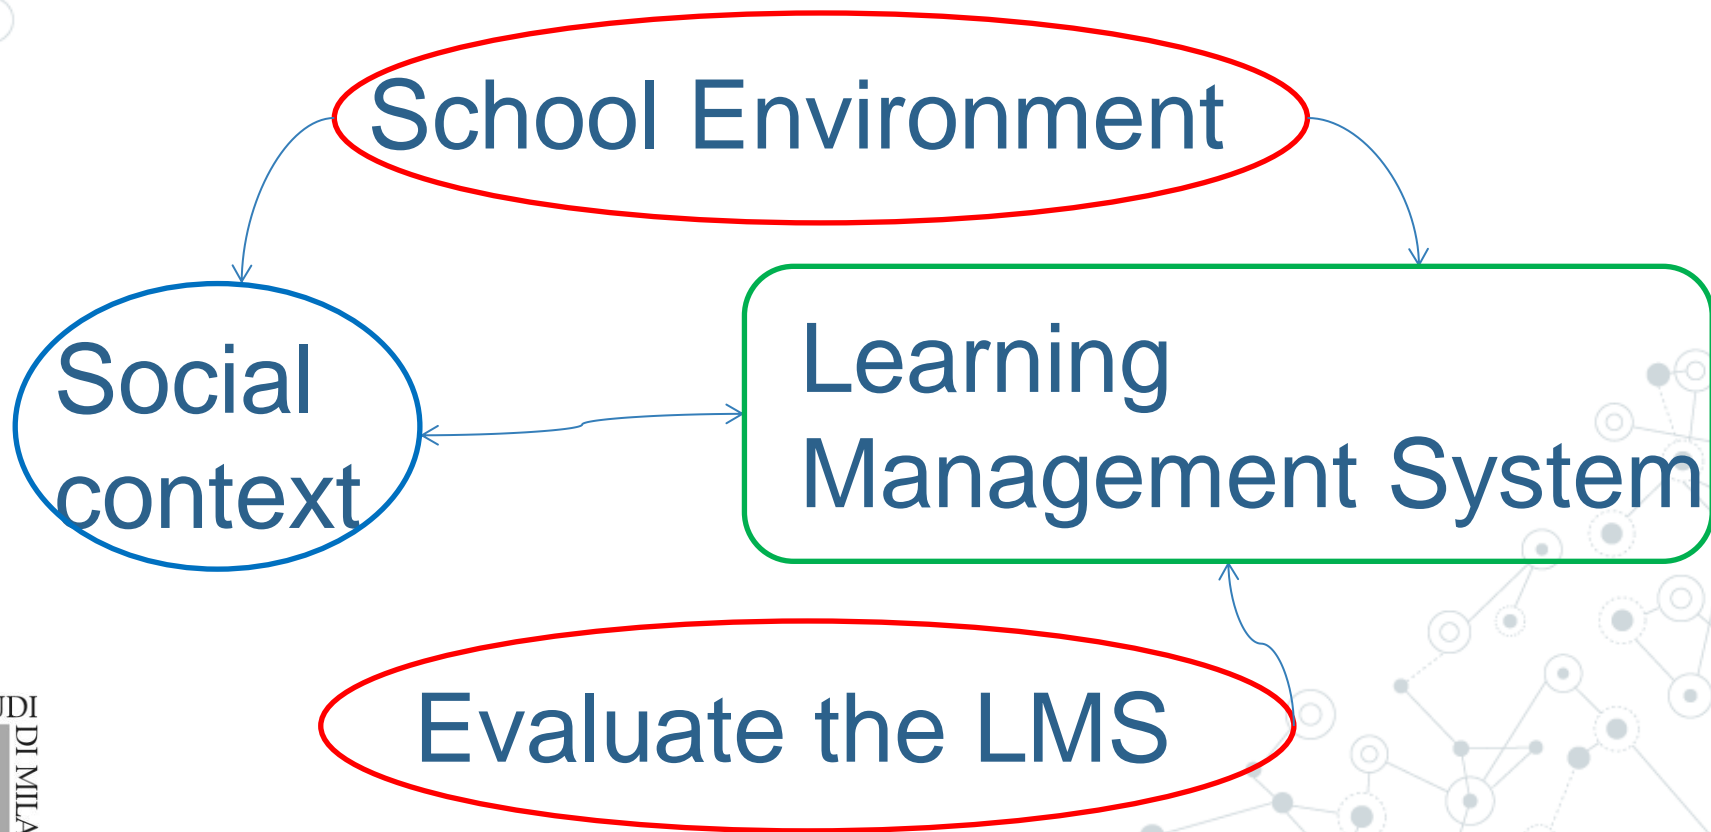

Total connection
at time n

$$K_n^F = C_n^F + \lambda_F K_{n-1}^F$$

time window

apply the new KP model

The LMS mediated interaction: **social network!**

the network is **defined** by the **material!**
